Pour l'étape 4, j'ai utilisé la commande `$ git add .` afin d'ajouter mon document "TP1 (FAS-1001)" à mon historique Git. J'ai tapé cette commande dans mon terminal à partir de RStudio.

Ensuite, je l'ai enregistré en utilisant la commande `$ git commit -m "Premier commit"`.

J'ai suivi le même procédé à l'étape 6 pour enregistrer mon document intitulé "Projet de session", en tapant `$ git add .` puis `$ git commit -m "Création du document du travail de session"`.

Lors de l'étape 4, un message d'erreur s'est affiché. J'ai donc suivi les étapes détaillées dans le message et ma commande `$ git commit` a fonctionné.
